ROAD TANKER INSPECTIONS

# WE'VE GOT YOUR TANKERS COVERED

From new tankers to fully utilised tankers, we know everything there is to know about your specialist vehicles. We keep your people safe and your business legally compliant and we'll do it around the needs of your business too. Simple.

UK ROAD TANKE  
INSPECTION LTD

PROUD TO BE PART OF THE BRITISH ENGINEERING SERVICES GROUP

## AN INDUSTRY LEADING APPROACH

UK RTI joined the British Engineering Services Group in 2019 giving us the opportunity to provide our customers with a combined (and enhanced) tanker service like never before.

With our team of industry experts and specialist technical support, we can support you every step of the way, no matter what you need. It doesn't matter where your tanker is in its life cycle either. Our end to end approach means we can always give you the very best service, helping keep your tanker safe and legally compliant every step of the way.

We know everything there is to know about the relevant legislation, keeping on top of any amendments and modifications, so you don't have to.

What's more, our tools and processes are built around you and your needs. We give you access to your electronic report, quickly and efficiently, meaning you're never in the dark when it comes to your tankers.

## OUR ACCREDITATIONS SPEAK FOR THEMSELVES

We're Type A and Type C accredited, giving you the peace of mind you deserve when it comes to your tankers.

And even better, with our geographical spread and mobile testing equipment, we can give you the support you need, regardless of where you are.

## FROM NEW BUILD...

If you're building new tankers, we can support you with that too. Right from the very start, our specialist engineers can work with you to verify your designs as 'fit for purpose'. And if you're almost ready to put your tanker on the road, we can witness your new build inspection. It really is that simple.

## ...TO PERIODIC INSPECTIONS

For tankers already on the road doing what they're meant to, maintaining up to date periodic inspections is essential. We can make this whole process easy for you, reminding you when your inspections are due and completing the most thorough examinations with minimum disruption to you and your business.

We were the first company in the UK to offer gas testing. With this approach we can save our customers time, money and resources compared to water based inspections, without impacting the quality of our service.

## WHY US?

- We're Type A and Type C accredited
- Our team of experts can support you at every stage of your tankers life cycle
- We offer gas testing for in service periodic inspections
- Our specialist engineers are spread across the UK
- With our on line reporting tool, we can give you quick access to your reports
- We can inspect tankers carrying Class Two substances

If you've worked with either UK RTI or British Engineering Services previously, all you need to know is that by bringing the expertise of these two companies together, we can now offer you an enhanced, end to end tanker service better than ever before.

We're delighted to have been able to do this for our customers. It works for us and we know it'll work for you too!
