

AT UK ROAD TANKER INSPECTIONS...

WE'VE GOT YOU COVERED.

Keeping our customers safe and your road tankers (and businesses) operational is our priority. And we're experts in all of the relevant legislation too, meaning you don't have to be. Quite simply, when it comes to road tanker safety, with our team of industry experts, you'll get the peace of mind that you deserve.

UK ROAD TANKER
INSPECTION LTD.

As part of the British Engineering Services Group, at UK Road Tanker Inspections we're focused on helping make sure our customers leave nothing to chance. We continue to work hard to provide our services in a way that works for you. Our team of specialist Engineers are spread across the UK completing mobile testing, meaning it doesn't matter where you and your tankers are located and how many we need to inspect, we can get the job done.

What's more, we won't cause you any unnecessary disruption or downtime. Not only do we complete the very best inspections, but we do it around the requirements of your business. Our national coverage allows a flexible approach so that we can complete your inspections on a date that suits you. We take your requirements seriously. We'll remind you when your inspections are due, and we'll work with you to get them scheduled and completed ahead of any deadlines.

INDUSTRY LEADING

As the first company to use gas testing for fuel tankers in the UK, we really are industry leading. Using this method maximises efficiency, minimises downtime and means we don't have to dispose of contaminated water, reducing any environmental impact compared to the more traditional water-based testing methods.

Once your inspections are complete and we are happy that your tankers are safe and fit for purpose, we'll email your certificate to you in just a few days. No fuss, no delay and nothing to worry about.

OUR ACCREDITATIONS SPEAK FOR THEMSELVES

We are more than qualified to give you what you need, and more.

- ✓ UKAS accredited to ISO/IEC 17020:2012
- ✓ BSI 9001:2015 accreditation

And because we're "type C" AIB accredited, we can also complete like for like exchange of service equipment eg. PV vents (and our Engineers keep a stock of parts with them) to keep you on the road.

IN SHORT

Maintaining an up-to-date schedule of inspections for your road tankers is a 'no brainer.' Keeping your tankers safe is essential and minimises unnecessary risk to anyone who comes into contact with them. At UK Road Tanker Inspections, we'll help you stay safe and at the same time, we'll reduce disruption, keep environmental impact to a minimum with our innovative testing methods and help keep you and your business legally compliant at all times.

And what's more, we'll do it all in the most cost-efficient way possible.
